```

You can add options to executable code like this

```
df_gdp0<-WDI(  
  country = "all",  
  indicator = c('gdppc'="NY.GDP.PCAP.KD", 'poptot'="SP.POP.TOTL"),  
  start = 1980,  
  end = 2019,  
  extra = TRUE,  
  cache = NULL,  
  latest = NULL,  
  language = "en"  
)
```

The `echo: false` option disables the printing of code (only output is displayed).
